

 **liquidelements™**
artfully poured floors™

Uncommon designs, influential colors and functional surfaces.

liquidelements, artfully poured floors bring seamless designs in dramatic looks for commercial interiors – hotels, showrooms, restaurants, stadiums, casinos, offices and retail spaces.

liquidelements is a brand of **STONHARD**, drawing on nearly a century of experience in formulating and installing resinous floors.

And new to **liquidelements**, our extraordinary wall panels utilizing the same technology as our poured floors, catching the eyes of interior designers across the globe.

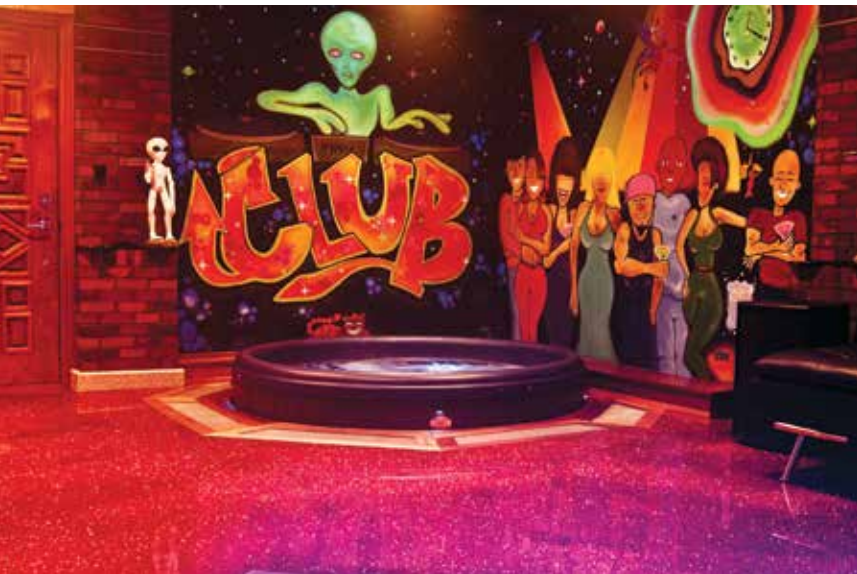

CLARITY, COMMITMENT & CARING.

We are accountable for our products through their entire life cycle, protecting and honoring our planet by supporting the principles of green design. As members of the United States Green Building Council, we help you achieve LEED certification. We are also part of the HPD Collaborative, offering transparency on our products and showing our customers and end-users that we take the necessary steps to support a balanced, healthy environment.

run wild

with color

Fresh and fun, brazen and bold, tart, toasty and timeless. What color are you? See our classic color collections, along with custom colors to meet design requests or support company brand & identify guidelines.

This sleek, self-leveling floor offers depth and mood in a matte, satin or gloss finish. Smooth performs in any contemporary commercial setting, stands up to extensive foot traffic and is available in a spectrum of color choices, including the Duo Line with complementary or contrasting color blends. Despite its rich finish, Smooth is resilient, scratch resistant, comfortable underfoot and easy to maintain.

Reflect's swirling, illuminated surface borrows its generous palette from the earth's metallic landscape. Reflect is offered in two finishes: Hammered, vintage and antique; and Wind, tousled and carefree. All are resilient, comfortable underfoot and easy to maintain. Waxing and a regular maintenance program is required to maintain high-gloss finishes.

REGAL

SOPHISTICATED

ELEGANT

Hotel Lobby // Reflect in a high-gloss finish

High design, high performance, this floor provides a busy metropolitan hotel lobby with a glossy, resilient floor that meets the demands of continuous foot traffic and wheeled luggage.

This sparkling, glossy floor reveals color from every direction. The adventurous colors fused with natural metals evoke iconic drama; from the Vegas Strip to Haute Couture runways, this dazzling, resilient floor will ensure comfort underfoot while remaining easy to clean and scratch resistant. Waxing and a regular maintenance program is required to maintain high-gloss finishes.

A thoroughly unique, reflective surface that encourages individualism. Capture allows you to set the mood and theme by locking inanimate objects in a rich, thick resin. Encasing printed graphics and artwork gives designers complete personalization of the floor. While each Capture theme is different, the floor remains resilient, comfortable underfoot and easy to maintain.

Waxing and a regular maintenance program is required to maintain high-gloss finishes.

The urban look of concrete with a smart, contemporary, mottled look and a slightly textured surface. Polished rivals its competition in appearance and performance. It's earthy and intriguing colors are available in matte and gloss finishes.

polished

VOGUE

SUBLIME

DIGNIFIED

Hospital Food Court & Waiting Area // Polished in a high-gloss finish
Healthcare environments require soothing palettes and strong performance. Polished delivers with reassuring design, slip resistance, durability and an easy to maintain surface.

Wall panels provide intrigue and enrich spaces with the same unique, stunning finishes as our floors – glitter, filigree and high-gloss, resinous designs ensconced in easy-to-install wall panels. Handcrafted wall panels complement floors while creating their own stand-alone attention for vertical spaces. Ask our Architectural representative how we can help create wall panels for your next project.

wall panels

VERTICAL DESIGNS
COMPLEMENTARY TO FLOORS
EASILY INSTALLED

Wall panels are available in the same palettes as our floor systems. Custom color and designs can be created to work with other design elements. We will provide samples.

Available on composite aluminum or MDF backer board.

Aluminum Panel size: 4' x 8'

MDF panel size: 4' x 8' or 5' x 10'

Shipped in flat panels to job site, to be installed by carpenter or millwork trade.

Transform ordinary into extraordinary. Our artfully poured floors, while still seamless, reliable and long-lasting create even more attention when we partner with individual artists who produce exclusive, handcrafted, artistic expressions on floor surfaces. If you are planning a masterpiece and one-of-a-kind space, our Architectural representative can talk with you about our Artist Series.

HIGH GLOSS

GLOSS MICROTEXTURE

SATIN

MATTE

Finishes give you even more options so you can achieve the look you want, along with the functionality you need. We offer four standard finishes.

HIGH GLOSS

High sheen, mirror-like surface for the ultimate in luster and shine. Ideal for low to moderate foot traffic. To maintain continuous gloss appearance, regular maintenance and waxing is required. We will provide you with directions and guidance on how to maintain your high-gloss floors. Available with Smooth, Glitz, Reflect, Capture and Polished floors. *Note: 1mm systems are not available in a high-gloss finish.*

GLOSS MICROTEXTURE

A subtle combination of our gloss and satin finishes, this finish requires our Stonseal SK6-GT product, which incorporates a high-performance, aliphatic polyurethane/polyurea topcoat along with a fine texture to offer improved slip resistance, wear resistance, and UV resistance. The Gloss Microtexture finish is easy to clean and does not require wax. Available with Smooth, Glitz, Reflect and Capture floors.

SATIN

Silky, with an almost pearl-like sheen, this finish requires our Stonseal SK6-SF product, a high-performance, aliphatic polyurethane/polyurea topcoat combined with a durable polymer microsphere. This finish provides excellent wear resistance, UV resistance, is easy to clean and does not require waxing. Available with Smooth, Glitz Mineral and Reflect floors.

MATTE

Smooth and subtle, clear and flat, our matte finish utilizes our Stonseal CF7 product, which is a high-performance, water-based, aliphatic polyurethane coating that combines excellent wear resistance and UV resistance. Matte finishes are easy to clean and do not require waxing. Available with Smooth, Glitz Mineral, Reflect, Capture and Polished floors.

Color and texture can influence perception. Our seamless designs bring you the unique design elements you want without sacrificing performance. Choose colors and textures from our Liquid Elements systems, as well as from other Stonhard brands.

THICKNESSES

All Liquid Elements floors are offered in our standard 2mm thickness. Our 2mm versions provide a level, ergonomic surface that offers comfort superior to a traditional epoxy surface. Our floors are self-leveling and therefore require an extremely flat surface. This will typically require more rigorous preparation by our installation crew to produce the smoothest finish possible. 2mm floor systems also provide sound-dampening properties important in commercial spaces.

Note: This applies to our self-leveling systems only.

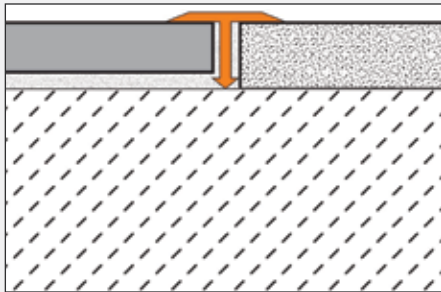

We offer a 1mm option for our Smooth, Glitz Mineral and Reflect systems for those applications where a thinner system is specified – newly constructed stadium concourses, automotive showrooms and in some cases, retail stores. The 1mm will closely follow the contour of the existing substrate and does not offer the same ergonomic and sound dampening properties. Our popular metallic finishes, along with richly pigmented duos and natural micas, maintain their pop and distinctive appearance even in a thinner application.

TRANSITIONS

Where a flush transition is desired, please contact your local Liquid Elements representative for recommendations.

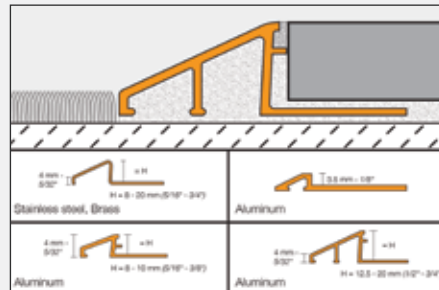

Reno T

Recommended transition for all Liquid Elements systems between systems of similar height.

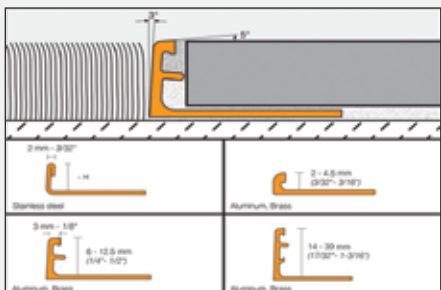

Reno U

Recommended transitions for Liquid Elements self-levelers when transitioning to tile or other flooring systems of different height.

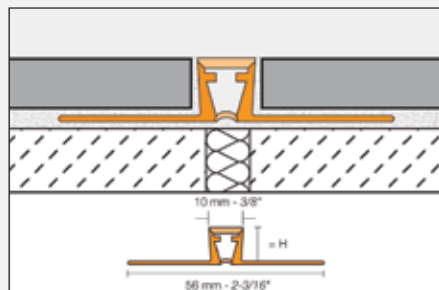

Schiene

Recommended for strip designs and borders in Liquid Elements Crush.

Dilex bwb

Recommended to use as an expansion joint with Liquid Elements Crush.
